

 **Acumatica**
The Cloud ERP

+ PROCORE

PROCORE + ACUMATICA

**Great companies aren't built on software.
They're built by people who have the
right tools to do their best work.**

Connecting the job site and the home office, rolled out by the only service partner who specializes in setting up these two best-in-class construction platforms.

One partner. Two platforms. No hand-off.

Most Contractors running Procore and their Accounting System end up as the connective tissue between two vendors, two support queues, and two implementation teams who've never spoken to each other. **DOPEX closes that gap** — we're the only firm built to implement, integrate, and support Procore and Acumatica, together.

WHAT'S INCLUDED?

Acumatica (Construction Edition)

- Unlimited-user licensing — cost scales with transaction volume, not with how many people need a login
- Native payroll and embedded CRM — no bolt-on modules, no extra vendors to manage
- Full construction accounting — job costing, AP/AR, GL, multi-entity and intercompany consolidation
- Real-time sync of budgets, cost projections, commitments, and change orders between field and office
- Compliance tools: lien waivers, COIs, W-9s, and vendor documentation
- Embedded AI studio enabling chats with your data and dynamic dashboard buildouts

PROCORE

Procore

- Project management, field execution, quality and safety workflows
- Real-time daily logs, photos, RFIs, and submittals from the field
- Drawing and spec management, so every trade works from the current set
- Cost management tools for project budgets, prime contracts, subcontracts, purchase orders, change orders, and invoicing
- Agave — the integration layer we recommend for connecting Procore and Acumatica

*"We love working with DOPEX. They speak our language.
They just get it."*

— VICE PRESIDENT, \$75M GENERAL CONTRACTOR

Specifically built for Construction. Not bolted together, like Sage.

Acumatica (est. 2008) is an actual software company that builds itself. It didn't enter the construction market through acquisition, like Sage did with Intacct.

FEATURE	ACUMATICA	SAGE INTACCT
Payroll		
CRM		 <i>via Salesforce or SageCRM</i>
Inventory & Warehouse Mgmt		
Document Management		 <i>via PaperSave or DocLink</i>
Multi-language Support		
Project Accounting		

BIG DIFFERENCES

LICENSING MODEL

Unlimited users, consumption-based

Sage: per-user pricing

API & INTEGRATIONS

REST / OData API, unmetered

Sage: metered past 100K/mo — \$0.15/10 (Apr 2025)

The Acumatica Construction Edition (2018) was purpose-built from the ground-up and integrated with Procore the same year. Sage bought Intacct in 2020 to begin offloading folks from Sage 300 (Timberline) — and they integrated to Procore 5 years after Acumatica.

Let's build your Procore + Acumatica package.

Book a tailored walkthrough and we'll map out licensing, integration, and a rollout plan built around how your team already works.

01 • BOOK A CALL

A quick intro call to see where Procore and Acumatica live in your business today.

02 • WE SCOPE IT

We map licensing, integration, and a rollout plan built around your team.

03 • KICK OFF

One team gets you there. Not two vendors handing you off.
